Trygg
Governance without the grind.
SAFE TODAY | STRONGER TOMORROW.

Desk Card

Protect Your Retirement Accounts

Keep this where you check the account.

1. Do not tap the link. Open the firm's site or app yourself.
2. Use a different password for each account. A password manager can hold them. Do not share them.
3. Turn on a second factor, such as a code or a fingerprint, on top of the password.
4. Install security updates when they arrive.
5. Use your own device. Skip a public computer. If you had to use one, clear the history after you log out.
6. Wait for a network you trust. Skip cafe and airport Wi-Fi for the account. At home, put a strong password on the router.
7. Read the statement. Call the firm if money moved, or if the address, email, or phone changed, and you did not do it.

THIS WEEK

Turn on a second factor for one account before the next payday.

If money already moved, call the firm at the number on the statement, then file at ic3.gov.
